

Our core objectives

1. Promote the conservation, protection, and benefit of the coastal and marine environments.
2. Promote and support communities and work with Government to establish a system of conservation measures and biodiversity protection areas.
3. Support and create opportunities for environmental professionals to work and engage with schools and communities in environmental education and ecological restoration and conservation management.
4. Create, foster, and offer environmental educational strategies, programs, resources and engagement activities to the community.
5. Assist in, promote, support and carry out scientific research on coastal and marine environments.

Our Seas Our Future (OSOF) is a non-profit organisation with regional areas of operation across New Zealand. Visit www.osof.org to learn more about our organisation.

Protecting New Zealand's coastal and marine ecosystems through advocacy, education, and environmental stewardship, ensuring that they are managed sustainably and protected for future generations.

About us

Our Seas Our Future (OSOF) is a non-profit marine conservation organisation based in Aotearoa/New Zealand. We operate nationwide with regional hubs across New Zealand.

Our mission is to protect New Zealand's coastal and marine ecosystems through advocacy, education, and environmental stewardship, ensuring that they are managed sustainably and protected for future generations.

The idea that gave rise to OSOF still drives us today; we are all stewards of our marine environment, and how we treat our environment now will shape the world we are living in tomorrow; the health of our seas is intertwined with our future.

Our work

Our work is carried out under four overarching areas, encompassing some of the largest environmental issues facing our planet today:

Plastic Free New Zealand raises awareness of the effects of plastics and other anthropogenic materials on our environment and advocates for environmentally friendly solutions.

More Marine Reserves highlights and advocates for the establishment of more marine reserves, and ecosystem protection in New Zealand and worldwide.

Sustainable Seafood Now raises awareness of the current state of the world's fisheries and advocates for sustainable fishing practices.

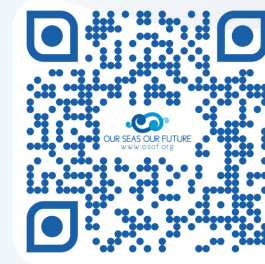

Climate Action Now highlights the effects of climate change on our natural environment and society, while advocating for solutions.

Volunteer with us

Our team is passionate about protecting New Zealand's coastal and marine environment. From beach clean-ups to environmental education and policy work, we have opportunities to get involved in a range of projects.

Get in touch with us via email link: info@osof.org or visit our website to find out more: www.osof.org

Other ways to support us
